Reference Letter for Ms. Shebin Sadiq

I am writing this reference letter at the request of Ms. Shebin Sadiq who is applying for a position at your company.

From my direct supervision of Shebin over about five years, she was unfailingly pleasant, reliable, courteous and hard-working. Shebin was able to master the air quality management information system (AQMIS) we had developed for Kuwait Environment Public Agency in a remarkably short time. Using this system, Shebin was able to calculate the emissions of many activities in Kuwait using US-EPA AP42 emission factors. This task covered all emission sources in Kuwait and it included many engineering calculations. Shebin was also instrumental in calculating emissions where AP42 methodology was nonexistent or required input which was unavailable. Her expertise in data handling in Excel is worthy of mentioning. I can verify that Shebin possesses the abilities, strength, willingness, and the enthusiasm to take a relevant position. Shebin is a self-motivated person with high cognitive abilities and I am sure that she would thrive in an appropriate work environment. I give her my strongest possible recommendation.

I would like to take this opportunity to thank you for considering her application. Do not hesitate to contact me if you have any questions or wish to clarify any points with me.

Yours sincerely,

Ashraf A. Ramadan (PhD, BEng, PMP, EurIng, CEng, MIMechE, CMIMechE-Kuwait)
Senior Research Scientist
