PROFESSIONAL SUMMARY

Business Analyst and IT professional with 13+ years of combined experience across business reporting, CRM administration, workflow automation, environmental data analysis, software development and web development. Currently supports executive and operational reporting using Microsoft Excel, Power BI, Zoho CRM/Analytics and SQL. Hands-on experience administering Zoho CRM, creating workflow automations with Microsoft Power Automate and Zapier, and using generative AI tools to support analysis of large datasets and management-ready reporting. Earlier Systems Analyst experience on Kuwait's national emission inventory project and a software development background provide a strong technical foundation for bridging business needs and technology solutions.

CORE COMPETENCIES

Business Analysis & Reporting: Business Process Improvement, Executive Reporting, KPI Reporting, Reporting Requirements Analysis, Stakeholder Communication, Documentation, User Training

Business Intelligence & Analytics: Data Analysis, Microsoft Power BI, Microsoft Excel Reporting, Zoho Analytics, Dashboard Development, Data Visualization, SQL for Reporting, AI-Assisted Business Analysis, Management Reporting

CRM & Automation: Zoho CRM Administration, Zoho Forms, Microsoft Power Automate, Zapier, Workflow Automation, Business Process Automation

Technical Foundation: SQL, Java, PHP, HTML/CSS, MySQL, WordPress, Joomla

PROFESSIONAL EXPERIENCE

Business Analyst - Future Kid Entertainment & Real Estate Company, Kuwait

Oct 2021 - Present | **Department:** Information Technology

- Gather and analyse IT-related requirements across departments and translate them into practical solutions for reporting, CRM, workflow automation and internal systems.
- Coordinate with internal teams and business departments to understand process needs, clarify ad hoc report requirements and support improvements to business workflows.
- Support business process improvement initiatives by designing internal systems for maintenance ticket handling, branch service requests, event registrations and structured data collection.
- Develop and maintain executive reporting solutions using Microsoft Excel and Power BI, providing senior management with visibility into revenue, daily income, visitor trends, customer spending, game performance and other KPIs.
- Prepare recurring and ad hoc management reports for Sales, Marketing, Operations, Finance and Executive Management, supporting business reviews, promotions, performance monitoring and operational decision-making.
- Built and continue to enhance Power BI reporting assets, including a dashboard and multi-page report for management reporting.
- Administer Zoho CRM for online customer recharge and customer management operations, including workflow automation, reporting, dashboards, analytics and data backup activities.
- Use Zoho Analytics and Zoho Forms to support dashboarding, business analytics, event registrations and structured data collection processes.
- Design and maintain workflow automations using Microsoft Power Automate and Zapier, including approval workflows, email notifications, CRM data backups and process automation.
- Converted manual approval activities into structured sequential and parallel digital approval workflows, improving process consistency and reducing manual follow-up.

- Write, review and modify SQL queries when required to support data extraction, custom report generation and reporting accuracy.
- Use generative AI tools to support analysis of large datasets, identify trends and prepare management-ready analytical summaries and business reports.
- Create and maintain technical manuals, knowledge base articles, standardized templates, process documentation and user training materials for internal processes and workflows.
- Support internal IT and business initiatives, including Google Business Profile data support and website-related activities.

Systems Analyst - Environment Public Authority (EPA), Kuwait

March 2017 - January 2021 | *Project: Development of Emission Inventory for the State of Kuwait*

- Played a key role in the development of Kuwait's national emission inventory by collecting, validating, managing, and analysing large volumes of facility and industry data across multiple emission sectors.
- Operated and maintained the AQMIS application to manage emissions data, run models, analyse results, and generate emission, monitoring, and risk reports.
- Calculated emissions for refineries, MEW facilities, KOC facilities, vehicles, shipping, aviation, municipal landfills, quarries, wastewater treatment plants, petrol stations and other industries.
- Prepared emission reports, monitoring reports, risk reports and related analytical outputs for project review and environmental decision-making.
- Coordinated data collection and clarification with industries, the project manager, local technical teams and international teams in Canada, France and the United Kingdom.
- Compared calculated emissions against EPA limits and analysed air monitoring station data against Kuwait Ambient Air Quality Standards.
- Built and maintained Excel-based calculation and validation models using formulas, filters, pivot tables, macros, conditional formatting, lookups and charts.
- Created AQMIS templates, selected appropriate AP-42 calculators and developed user-defined calculation approaches when standard calculators did not fit the process.
- Prepared high-level and low-level technical and functional documentation, user guides and knowledge base articles; mentored team members and supported knowledge sharing.

EARLIER EXPERIENCE

Lead Web Developer - Jiveey International, Kuwait

November 2013 - June 2015

- Led web development activities, allocated work to team members, reviewed scripts and provided technical guidance and feedback.
- Developed and implemented customized websites and user interfaces, integrating SQL databases and web technologies to deliver complete solutions.
- Refined technical specifications, supported system integration and prepared user manuals, guidelines and technical documentation.

Software Engineer & IT Trainer - OCL Technologies, Kochi, India

February 2009 - March 2012

- Developed software solutions using Java, JSP and MySQL, including technical specifications, flowcharts, layouts and supporting documentation.

- Designed and delivered IT training programmes, course materials, exercises, manuals and learner assessments for internal and external training needs.
- Liaised with users, tested applications, supported production issues and documented solutions for operational use.

Human Resources Staffing Specialist - Acculogix Software Solutions Pvt. Ltd., Bangalore, India

July 2008 - January 2009

- Supported staffing operations, candidate evaluation, interviews, onboarding, orientation programmes, employee data sheets and performance management administration.
- Prepared employee data sheets, supported performance management processes and assisted managers with policy and employee-related information.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science - I.E.S. College of Engineering, Calicut University, India (2007)

TRAINING

- Power BI Training – Completed, March 2026
- Google My Business Optimization - Completed, December 2023
- AQMIS Training - Lakes Environmental Consultants Inc. (2017, 2018, 2020)
